

EPO received full AAALAC accreditation

The AAALAC accreditation is a major achievement for EPO's operation as international service provider for preclinical oncology.

With more than 20 years experience EPO is offering:

Tumor models for in vivo drug screening:

- more than 500 PDX models
- immune oncology models (including humanized mice)
- orthotopic and metastasizing tumor models

EPO is providing laboratories with high hygienic, veterinarian and quality standards.

- Biosafety S1 or S2 laboratories
- Tumor irradiation and studies with radioactive isotopes
- Tumor imaging (bioluminescence and ultrasound)
- Board certified pathology

EPO performs your comprehensive, tailored preclinical study with high flexibility and intense communication.
